1.8 Systematic Investment Plan (SIP)

A Systematic Investment Plan or SIP is a very convenient and disciplined way of investing money in mutual funds. SIP allows an investor to invest a certain pre-determined amount at a regular interval (monthly, quarterly, semi-annually, annually, etc.). A SIP is a planned approach towards investments and helps to inculcate the habit of saving and building wealth for the future. Apparel sector workers may grow their money through SIP that starts as low as BDT 500 in this Fund.

Investment Horizon

An investor can invest in the plan with an investment horizon of 2 years/3 years/5 years/10 years with the choice of a pre-determined amount to investment at a regular interval (monthly/quarterly/semi-annually/annually). At maturity, the investor may surrender or continue with existing/new plan.

Buy Process

An investor can invest through SIP in following ways:

- The investor may give an auto debit instruction to the Bank on which s/he is maintaining a bank account to credit a specific amount of fund for a specified period to the Bank account of "Esquire ICL Apparel Fund", or
- The investor may provide post-dated account payee cheques in favour of "Esquire ICL Apparel Fund" mentioning specific investment amount to the asset manager/selling agents at a regular interval (monthly, quarterly, semi-annually, annually, etc.), or
- The investor may deposit their money through bKash / DBBL Rocket account or wallet number / mobile apps to the merchant wallet number of "Esquire ICL Apparel Fund".

After clearance/encashment of cheque or realization of the fund through auto debit transfer, the SIP unit holder will be issued a confirmation of unit allocation against every purchase of units. If BO Account is provided during the registration, the units will also be delivered to the unit holder's BO Account.

Surrender Process

SIP encourages a disciplined investment. It is advisable to continue SIP investments with a long-term perspective but there is no compulsion. Investors can discontinue the plan at any time. If, an investor wants to terminate the SIP before two (2) years, 1% discount from the repurchase/surrender price will be applicable on total accumulated invested amount on the date of cancellation of the scheme. After maturity of SIP, the investor can easily surrender through AMC or Selling Agents.

After receiving the surrender application form, the investor will be paid within 5 (Five) working days through an account payee cheque / BEFTN / payment through bKash / DBBL Rocket account as per client's request in case the withdrawal amount is equivalent or below BDT 5 million. In case the withdrawal amount is above BDT 5 million, the investor shall receive the fund within 7 (Seven) working days of receiving the surrender request.

Benefits offered for SIP Investors

- Flexibility in Periodic Investment:** SIP is a systematic investment plan. An investor can start SIP with BDT 500 and above by mentioning pre-determined investment amount through a specified period.
- No Minimum lot size:** Under SIP, there will be no minimum lot size like normal investors. Based on the investment amount and available weekly NAV at that point of time, units will be credited to investor's account. However, any fraction amount remaining will be converted when it sums up to one unit. The fractional amount will be kept as liability of the fund in a separate account head and will be adjusted with the next available investment amount.
- CIP option for the SIP investors:** SIP investors can enjoy either cash dividend or cumulative investment plan (CIP). In case of CIP, the investor will be allotted new units of the fund equivalent to the cash dividend.

DETAILED OF SIP SCHEME, SCHEME INFORMATION WILL BE PROVIDED IN THE SCHEME BROCHURE IN FUTURE.

CHAPTER 2: BACKGROUND

2.1 Preamble: Rapidly growing export earnings from Apparel sector

The of economy of Bangladesh began with transformation from agriculture intensive economy to industry, significant portion of which come from apparel sector. Total export from Bangladesh was USD 36.7 billion in FY 2017-18 and 83.49% came from apparel export¹. According to a research from Royal Melbourne Institute of Technology (RMIT), apparel export of Bangladesh is expected to reach USD 50 billion by 2021².

Around 4 million workers are engaged in this sector most of them are female and earn minimum wages. Historically, the apparel manufacturer made payment to workers through cash due to conveniences and limited access of workers to Banking channels. However, the journey from cash to the Bank / mobile based wage payments in apparel sector is gathering pace as apparel manufacturers understand how digitizing wages can save time, reduce costs, increase transparency and empower workers by improving their access to finance. Besides, digital wage payment has also yielded a range of benefits for both employers and employees, including increased transparency, providing added potential to assist with audits and supply chain accountability, ensuring the accuracy of workers' payments and reducing the risk of loss or theft of wages for workers, increased financial inclusion as well as greater ability to save, particularly for women workers.

According to a research conducted by CARE Bangladesh, 62% of the female RMG workers are saving for the future and they considered three (3) options for savings;

purchasing land, business investments and fixed deposits³. However, most of them face lots of challenges during personal financial needs and they have very limited access to appropriate financial products to ensure growth of their hard-earned financial wealth.

In this backdrop, ICL has planned to launch Esquire ICL Apparel Fund to offer a capital market product with special concentration to apparel sector workers. Combining efficient fund management and higher average return compared to money market products, ICL will help apparel workers to grow their money like other institutional investors. However, Sponsor and any unitholder may contribute a portion of their dividend income to create a positive impact on the lives of under-privileged apparel workers.

2.2 Growing opportunities for Investments in Capital Market

Capital Market globally has been one of the most significant factors for the development of economies. In one hand, it provides required growth funding for majority of the global successful companies, on the

other hand, it has been the most desired investment destination for long term savers specially pension funds, insurance funds, and for the individuals like apparel sector workers in general. As of 30 June 2018, market capitalization of Bangladesh was almost USD 46.35 billion, which is 18.1% of the GDP.

Although, the market has gone through a bear market in 2018, recent political stability and comprehensive effort from the Bangladesh Securities and Exchange Commission (BSEC) will eventually uplift the market.

The New Public Issue rules issued in 2015 has already increased the flow of IPO applications and the revamped book building method is making good companies interested to get listed. Right at this moment, there are 313 companies listed in the market, in days to come for prudent public issue rules, the number of listed companies are likely to increase.

Apart from above rules, BSEC has also issued several other rules and guidelines such as Alternative Investment Rules, Exchange Traded Fund Rules, and Financial Derivatives Rules.

Under the Alternative Investment Rules, fund managers can float venture capital funds, private equity funds and impact investment funds. Fund managers will invest in growing companies and actively add value to the firm through their financial and managerial expertise. Once the investee company is ready, fund managers are most likely to exit their investment through IPO or other agreed arrangements. These coordinated efforts will make the capital market vibrant and enhance the transparency and efficiency of overall capital market industry in the long run.

Considering all the factors, Bangladesh is to enjoy significant growth, and some of the listed sectors and companies within are likely to be beneficiary of this growth, as well. In this backdrop, this is perhaps appropriate time to invest in the leading growth potential sectors/industries of Bangladesh.

2.3 Advantages of Investing in Esquire ICL Apparel Fund

Following are the advantages the investors of Esquire ICL Apparel Fund will enjoy:

- I. **Corporate Governance:** Under all circumstances, ICL will ensure proper compliance of the BSEC (Mutual Fund) Regulations, 2001 ensure that all relevant information of the fund shall be properly disclosed to BSEC, Trustee and Custodian.
- II. **Research Driven Investment:** Impress Capital Limited has a dedicated team that continuously analyzes local & global economic indicators and conducts sector specific analysis. Based on economic and sector outlook, the team identifies companies that are undervalued, fundamentally sound, and growing with optimistic outlook which helps the investment managers to identify potential investment opportunities.
- III. **Diversified Portfolio:** The seasoned industry professionals of the team build an efficiently diversified portfolio by diversifying across the sectors and within the companies based on the in-depth research by the investment analysts. Therefore, the result of thorough research and a diversified portfolio is likely to be an opportunity for the investors to enjoy the benefits of professional investment management.
- IV. **Research Coverage:** The Research Team of ICL conducts spontaneous research on a regular basis on individual scripts on which investments are made from the fund taking into consideration any policies which might affect the economy, any significant industrial movement and to be specific any policies which might directly impact any companies on which investments are made. Accordingly, the investment management team with due approval from the Investment Committee allocates the assets of the fund to optimize the portfolio.

V. **IPO Quota:** Mutual Funds shall enjoy 10% quota on public issue under the BSEC (Public Issue) Rules, 2015. The investors of the fund shall enjoy the benefit of participating in IPO as the Initial Public Offering (IPO) in Bangladesh has historically performed very well.

VI. **Re-investment Opportunities:** The fund shall offer minimum 50% of annual realized profit as cash dividend on regular basis. However, investors will have the discretion of choosing between cash dividend and reinvestment of cash dividend through purchasing new units.

VII. **Flexibility in Investment:** In an open-end unit fund, investors have the full discretion to invest and withdraw funds as and when deemed appropriate. So, an investor may invest a lump sum at one period and withdraw the funds after a certain interval (e.g. 3-5 Years). At the same time, other investors can choose to invest small amounts on a monthly/quarterly basis just like DPS scheme of banks, and later withdraw a bigger sum. All in all, such open-end funds give individuals' complete flexibility to structure their investment, repurchase and withdrawal plan based on their own need.

VIII. **Tax Advantages:** Investment in this Fund by individual investors will enjoy tax exemption benefit under Section 44(2) of the Income tax Ordinance, 1984. Country's Finance Act and Government's tax policies will always determine the tax benefits from investment in mutual funds. CHAPTER 4: RISK FACTORS

Investors should know Esquire ICL Apparel Fund is not a guaranteed or assured return scheme and the past performance of the Sponsor and their affiliates/AMC does not guarantee future performance of the Scheme. The name of the Scheme does not, in any manner, indicate either the quality of the Scheme or its future prospects and returns.

The fund invests in listed equity securities, and thus has moderate risk aversion level. Following are the risk associated with investing in funds having exposure to listed equity securities:

4.1 Systematic Risk

Risks associated to the economy and market that can't be diversified are as follows:

- i. **Market Risk:** The price of shares may fall from the cost price, due to market and economy related factors.
- ii. **Interest Rate Risk:** The rise and fall of interest rate may change demand flow in capital market, hence may have positive or adverse impact.
- iii. **Regulatory Risk:** Changes in rules regarding fund management, and any regulatory issues related to the companies in the portfolio may expose the fund to regulatory risks.
- iv. **Political Risk:** A radical adverse political changes may impact the economy, capital market and businesses of the companies in the portfolio.

4.2 Unsystematic Risk

Sector and Company specific risks that can be diversified are as follows:

- I. **Business Risk:** The possibility, a company will have lower than anticipated profits or experience a loss rather than taking a profit.
- II. **Financial Risk:** The fund investing in equities of companies which may fail to meet its debt and interest payment obligations.
- III. **Credit Risk:** The fund investing in equities of lending institutions (Banks and NBFI) may possess some credit risk, as well.

By considering all the risks associated to investments, the fund is managed through investment research and due diligence. The risk is managed and minimized through dynamic and long-term based investment management and asset allocation strategies.

4.3 Risk Control Mechanism of the Asset Manager

Esquire ICL Apparel Fund aims to generate better risk adjusted return for the investors through professional investment management of the fund to generate capital gain. As the Fund will invest in growth assets, it is very important for the fund manager to understand all the associated risks with the investment securities and establish proper control mechanism to minimize those risks. ICL has engaged qualified investment professionals who have thorough knowledge about the downside risks of investment securities and would analyze all the publicly available data to discover the actual risk adjusted return of the securities. Apart from a well-qualified fund management team, there will be policies to check the investment risks.

- ICL's internal investment philosophy, which prioritizes good governance and adequate management capacity in case of investment decision, will immune the fund from investments in poorly governed investment securities.
- To minimize the risk of the fund, the investment of the fund will be managed professionally and prudently on a long-term basis.
- Every investment will be driven by thorough research and fundamental analysis.
- To minimize the downside risk of an investment, ICL would maintain proper margin of safety during investment.
- Liquidity risk will be addressed by properly assessing the ease of convertibility of the asset into cash.

THE MUTUAL FUND IS NOT GUARANTEEING OR ASSURING ANY RETURNS.

CHAPTER 5: INVESTMENT MANAGEMENT PROCESS

ICL aims to generate return for investors through capital appreciation of investment tailored to equity instruments. In order to fulfill the investment objective, the asset manager will adjust the portfolio on a continuous basis by identifying the investment opportunities and risks through rigorous economic, market, sector and scrip level analysis.

5.1 Asset Allocation

As the objective of the fund is to maintain a steady growth in the form of capital appreciation, ICL aims to allocate the fund between two broad categories of assets i.e. cash & cash equivalent assets and equity.

Cash and Cash Equivalent Assets: Cash and cash equivalent assets (including short term bank deposits).

Equity: Undervalued stocks that are expected to generate capital gain through price appreciation.

Based on economic conditions and market expectation, Investment Committee of ICL will decide appropriate weight in the above-mentioned asset classes. ICL will allocate higher weight in equity and lower weight in cash and cash equivalents when market is expected to go up and vice versa.

5.2 Types of Assets

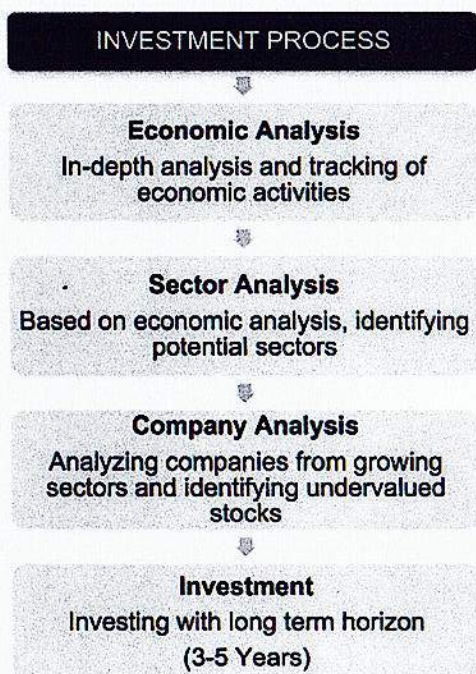

ICL will invest in equity and equity related instruments maintaining a growth in order to achieve the objective of the fund. Following is a summary of the types of assets available in Bangladesh for investment:

Equity: A stock or any other security representing an ownership interest is called equity. Equity investments available in Bangladesh are as follows:

- **Listed Equities:** Listed equities are companies whose shares are traded on stock exchanges.
- **Pre-IPO Placement & IPO:** A fixed quota of 10% of each IPO is allotted to Mutual Funds. In addition to the investment in IPO, Fund can make investment in Pre-IPO placements which generally has a lock-in period as per BSEC guidelines.

5.3 Investment Management Process

Investment research team of ICL conducts in-depth analysis on economic condition, changes in monetary and fiscal policies keeping a close eye on global and local economic indicators for next 3-10 Years.

Based on economic analysis, the team selects a list of sectors with the highest potential and analyzes companies under the sectors to forecast the companies' cash flows for the next 3-10 Years. Based on this in-depth analysis by applying standard valuation methods, our investment analysts determine fair value of every securities with high growth potential.

Finally, based on investment policy, capital market expectation, and prevailing capital market situation, our investment management team builds an optimized investment portfolio by selecting suitable and undervalued securities after due approval from the investment committee.

ICL has engaged fund manager who will further evaluate the investment opportunities recommended by investment analysts. The investment decisions recommended by fund managers will be subject to the final approval of the Investment Committee (IC).

ICL has an Internal Investment Committee comprising of the Managing Director, Chief Investment Officer, Head of Operations, Research in-charge and others who meet at periodic intervals. The Investment Committee, at its meetings, will review the performance of the portfolio and general market outlook and formulate broad investment strategy. The IC is responsible for ensuring that the investments are made as per the internal/regulatory guidelines, Scheme investment objectives and in the best interest of the unit holders of the respective scheme.

At periodic interval, Managing Director will present the performance of the scheme to the trustee.

5.4 Investment Execution Strategy

After thorough investment analysis there are a number of factors that ICL would consider for the execution of investment decision.

- **Momentum:** Momentum is the rate of acceleration of price or volumes. While investing in listed security, momentum of that particular security is an important issue to consider for executing investment decision.
- **Market Sensitivity:** Some securities are highly sensitive to the market movement reflecting a higher beta and vice versa. Such relationship with market needs to be identified for higher risk adjusted return.
- **Margin of Safety:** Margin of safety is a principle of investing in which a security is purchased when the market price is significantly below its intrinsic value. This difference allows an investment to be made with minimal downside risk. For example, if an investor pays BDT 9.00

for a security that s/he believes to be worth BDT 10.00, her/his margin of safety is $[1-(9/10)] = 10.00\%$. The more is the margin of safety, the less is the downside risk.

- **Liquidity:** When investing in a comparatively illiquid security, proper caution will be taken so that price of the security does not move abruptly to evaporate the return potential. For example, if, the average volume of a security traded is 1,000 shares per day and the fund aims to buy or sell around 100,000 shares of that security, it would be very difficult to execute the trade and price of that security will move sharply hampering the targeted return from that investment.
- **Change in Fundamentals:** Once the fund invested in a particular security, that security will be continuously monitored for any change in the fundamentals on which the investment decision was made at the first instance and act accordingly.
- **Portfolio Rebalancing:** ICL will be flexible and vigilant enough to look for other investment alternatives with higher return potential and reshuffle the portfolio accordingly.
